Extra Math/Language Activities: Choose any of these to do and have FUN!! These are just ideas if you need some extra learning activities. :)

*Sort your socks.

How did you sort them?

Example~By color, size, etc.

*Make a pattern with jelly beans. (or any small item that you choose)

Have them describe their pattern to you.

~Example-Green, green, purple repeat green, green, purple (They might even call that an A AB pattern AAB pattern.)

OR

*Count a small bowl of jelly beans. How many are there? See if you can find the number to tell me how many you counted. (Write out 2 or 3 number choices on a piece of paper and they select the correct number.) They could even write the numeral themselves if they know how. :)

*Go on an Alphabet Hunt inside your house. When you see that letter cross it off on your list. (You can either write the upper-case letter list for them or they can try to write this list themselves.) :) You could time them for FUN and tell them how long it took them.

*Go on a shape hunt in your house or outside (if the weather permits) Draw the shapes that you find.

~Can you name the shapes that you found and drew?

Monday, March 30th, 2020

They can even try to sound out and write the names of some of the shapes.

*Create flat shapes with toothpicks or pretzel sticks. Can you try to write the number for how many sides each shape has?

*Roll two dice. Count the dots on each die. Which die has more dots?

Now, count the dots altogether on both of them. What is the total number of dots?

~You could write out the equation and they could copy it IF they are interested in doing that. :) $3+3=6$ **You or a sibling could do this outside with them using chalk if it is a nice day. :)
